

Wall Lamp WL

WL 8005

Private House

Designers often choose Astra wall luminaires, in order to obtain soft and diffused lighting, as well as to create elegant and practical lighting surroundings. The combination of downlight and uplight can be met in order to maximize the lighting output and minimize the glare effect.

These wall lamps, of cubical or rectangular shape, are made of extruded aluminum and can be painted with electrostatic powder coating in white, grey or black on request.

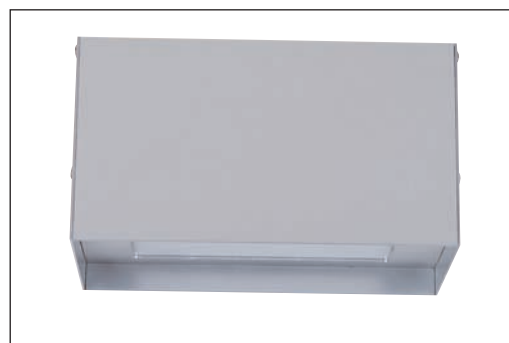

Best if used in:

- Banks
- Entrance Hall
- Hotels
- Restaurants
- Church
- Houses
- Public areas
- High ceiling structures.

On request light can be directed upwards, downwards or both as shown on these pictures.
